

SCLIntra™ Enterprise

Campus Logistics Software

SCLIntra Enterprise uses mobile computers and barcodes to monitor and control the flow of tangible objects — mail, parcels, property, files or people — as they enter, move through, and exit a facility. Designed for demanding, real-world applications, SCLIntra features intuitive user interfaces, rugged hand-held data collection devices, intelligent routing and sorting logic, text and email notification, signature capture and in-depth reporting. It allows any user to track any object, and monitor distribution, anywhere within your campus; yet it's flexible enough to adapt to the way your operation already works.

A Simple, Speedy, Customizable Process

- 

Receive
- Receive up to 1200 items per hour. Just scan carrier barcodes and automatically verify delivery counts.
- 

Sort
- Point and click to match each item with a recipient in the database. SCLIntra addresses, routes, and prints labels for efficient delivery. If desired, create barcode labels to make anything traceable.
- 

Route
- Send your team on its way with signature capture mobile devices. Intelligent routing puts the right packages on the right mobile device for each courier.
- 

Notify
- SCLIntra can automatically email or text notification to each recipient, eliminating unnecessary calls and inquiries. You decide when and if these are sent.
- 

Deliver
- Choose from dozens of desktop delivery options — signature capture, location scan, bulk deliver, alternate recipient, ID Badge scan, parent-child delivery and many more. Combine options to match your accountability needs.
- 

Pickup
- Create pickup requests from the desktop. Double productivity by delivering and picking up items in the same sweep. Close the tracking loop by connecting SCLIntra to your shipping system.

Powerful Mobile Application

- Mobile computing application & architecture same as workstation PC
- Security - Your data is safe on the SD card no matter what happens to the handheld
- Easy to install, configure and administer – just drop the SD card into any valid handheld and go to work
- Microsoft ActiveSync enabled - no extra software needed to sync. Sync over wi-fi, cellular, or USB.

Delivering Accountability

SCLIntra is scalable. SCLIntra is affordable. And SCLIntra is the only fully-integrated system built to run internally on your corporate network or externally in the cloud that is capable of managing your entire logistics process. Regardless of whether you have a single facility or a corporate campus, SCLIntra is:

<p style="text-align: center; font-size: 24px; font-weight: bold;">Accountable</p>	<ul style="list-style-type: none"> • Full chain-of-custody detail from receiving through delivery – for any accountable item that moves • Scheduling and tracking of deliveries, moves, and pick-ups • Standard and customizable management and service-level performance reports • Eliminate shrinkage and loss in the delivery chain • Outbound control – coordinate outbound shipments with mail stop pick-ups; even connect with your shipping system • High-speed barcode accuracy • Improved visibility to internal customers
<p style="text-align: center; font-size: 24px; font-weight: bold;">Expandable</p>	<ul style="list-style-type: none"> • Track Interoffice Mail • Initiate desktop shipping requests • Save with pouch mail to remote offices • Tie to shipper and ERP APIs to extend functionality and visibility
<p style="text-align: center; font-size: 24px; font-weight: bold;">Flexible</p>	<ul style="list-style-type: none"> • Language Selection based on Windows user login • 20 Variable User-Configurable Fields: Adding purchase order, RMA, serial and asset numbers is a snap • Custom screen layout & label designer • Myriad acquisition and deployment models – subscription, lease or perpetual license, on-premise, hosted, virtualized, single and multi-tenancy Cloud hosting
<p style="text-align: center; font-size: 24px; font-weight: bold;">Thoughtful</p>	<ul style="list-style-type: none"> • Localization support • Centralized application management • Microsoft ClickOnce™ deployment • Status driven process management • One click reporting through stored group searches • Integrates into your existing workflow • Automatic, logical courier routing based on your workflow • Uncomplicated screens and navigation • Self-service recipient delivery search through your corporate browser

SCLLogic is the leader in package tracking solutions. We design, develop, deploy and support our software. SCLIntra Package Tracking Solutions are available for purchase, rental or lease; on premise or hosted; you decide, we deliver.
